SUMMARY SECTION

INVESTMENT OBJECTIVE

THE FORESTER VALUE FUND (the "FUND") seeks maximum long-term capital growth.

FEES AND EXPENSES OF THE FUND

The table below describes the fees and expenses that you may pay if you buy and hold shares of the Forester Value Fund.

ANNUAL FUND OPERATING EXPENSES (expenses that you pay each year as a percentage of the value of your investment)		CLASS R
Management Fees		0.89%
Distribution and/or Service (12b-1) Fees		0.50%
Other Expenses		0.11%
Acquired Fund Fees and Expenses		<u>0.01%</u>
Total Annual Fund Operating Expenses ⁽¹⁾		<u>1.51%</u>

(1) The Total Annual Fund Operating Expenses in this fee table will not correlate to the expense ratio in the Fund's financial statements because the financial statements include only the direct operating expenses incurred by the Fund, not the indirect costs of investing in other mutual funds.

EXAMPLE

This Example is intended to help you compare the cost of investing in the Forester Value Fund with the cost of investing in other mutual funds.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of these periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

	<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
Class R	\$154	\$477	\$824	\$1,802

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual operating expenses or in the Example affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 12.76% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

THE FORESTER VALUE FUND invests in the stocks of large U.S. companies that it believes are undervalued and have great appreciation potential. It may also take defensive positions when the manager believes that the overall stock market is highly valued or that market conditions warrant it.

The Fund generally purchases a stock only at a price Forester Capital Management ("Forester Capital"), the Fund's investment manager (the "manager"), deems significantly below the intrinsic value of the company - Forester Capital's estimate of the amount a buyer would pay to own the entire company. Forester Capital performs its own fundamental analysis of the company.

The Fund places special focus on companies whose current market prices are low in relation to earnings and have great appreciation potential. In addition to stocks with low prices relative to earnings, Forester Capital also considers factors such as the following about the issuer:

- Book-to-market value
- Price-to-cash flow ratio
- Price-to-sales ratio
- Earnings estimates for the next 12 months
- Five-year return on equity

Under normal market conditions, the fund invests at least 65% of its net assets (at market value at the time of purchase) in the common stocks of large companies that have market capitalizations greater than \$5.0 billion. The Fund may emphasize sectors more or less than the S&P 500. The Fund may also invest in stock index options.

The Fund may sell a stock when Forester Capital thinks the stock is too expensive compared to Forester Capital's estimate of the company's intrinsic value, changing circumstances affect the original reasons for a company's purchase, a company exhibits deteriorating fundamentals or more attractive alternatives exist.

MARKET EXPOSURE. In order to try to enhance returns, the manager may vary the Fund's exposure to the overall stock market. The manager may reduce market exposure when the manager believes that the overall stock market is highly valued or that market conditions warrant it. During these defensive periods, the Fund may invest some or all of its assets in stock index options, money market funds, U.S. Treasury or U.S. Agency fixed income instruments with a maturity of less than five years.

PRINCIPAL RISKS

Like all mutual funds that invest in stocks, the Forester Funds take investment risks and it is possible for you to lose money by investing in the Fund. The manager's ability to choose suitable investments for the Fund has a significant impact on the Fund's ability to achieve its investment objective. The principal factors that might reduce the Fund's return include:

Stock Market Risk: The Fund invests primarily in common stocks and other equity securities. Over time, stocks have shown greater growth than other types of securities. In the short-term, however, stock prices fluctuate widely in response to company, market, economic or other news.

Value Investing Risk: From time to time "value" investing falls out of favor with investors. When it does, there is the risk that the market will not recognize a company's improving fundamentals as quickly as it normally would. During these periods, the Fund's relative performance may suffer.

Emphasize Sector Risk: If the Fund has a higher percentage of its total assets invested in a particular sector, changes affecting that sector may have a significant impact on the Fund's overall portfolio.

Varying Market Exposure Risk: If the Fund is in a defensive or offensive position, the Fund may not go in the same direction as the market and the Fund's performance may suffer.

Large-Size Company Risk: The Fund normally invests the majority of its assets in larger companies. Larger, more established companies may be unable to respond quickly to new competitive challenges like changes in consumer tastes or innovative smaller competitors. Also, larger companies are sometimes unable to attain the high growth rates of successful, smaller companies, especially during extended periods of economic expansion.

Options Risk: The primary risks associated with options investments are: (1) the risk that changes in the value of the investment will not correlate to changes in the value of the underlying security, which may result in imperfect hedging of a portfolio position, (2) options are more volatile than stocks and therefore may be subject to disproportionately larger gains or losses; and (3) the risk that the use of an option strategy to enhance the return of a portfolio will fail, with negative consequences to the Fund. Put options may not go in the same direction as the market and the Fund's performance may suffer. Accordingly, the Fund will limit its exposure to options to 5% of the value of the portfolio, based on the cost of the options, at any one time.

Fixed Income Risk: The primary risk associated with fixed income are: (1) the fixed income instrument may not go in the same direction as the market and the Fund's performance may suffer; (2) interest rates may rise, reducing the principal value of the instrument; and (3) the credit rating of the U.S. Agency instrument may materially differ from a similar U.S. Treasury.

Turnover Risk: Portfolio turnover refers to the rate at which the securities held by the Fund are replaced. The higher the rate, the higher the transactional and brokerage costs associated with the turnover which may reduce the Fund's return, unless the securities traded can be bought and sold without corresponding commission costs. Active trading of securities may also increase the Fund's realized short-term capital gains or losses, which may affect the taxes you pay as a Fund shareholder. Short-term capital gains are taxed as ordinary income under federal income tax laws.

An investment in the Fund is not a bank deposit, and is not insured or guaranteed by the Federal Deposit Insurance Corporation (FDIC) or any other Government agency.

Because of these risks the Fund is a suitable investment only for those investors who have long-term investment goals. Prospective investors who are uncomfortable with an investment that will increase and decrease in value should not invest in the Fund.

FUND PERFORMANCE – Class R Share

The Bar Chart and Table set out below help show the returns and risks of investing in the Fund. They show changes in the Fund’s calendar year performance over the lifetime of the Fund and compare the Fund’s average annual returns for periods of one year and since inception (12/28/10) to an appropriate index during corresponding periods. You should be aware that the Fund’s past performance (before and after taxes) is no guarantee or indication that the Fund will perform similarly in the future.

The year-to-date return for Class R shares as of June 30, 2017, was -1.97%.

From 12/28/2010 (the share class’s inception) through 12/31/2016, the highest and lowest quarterly returns were 6.45% and -4.43%, respectively, for the quarters ended March 30, 2013 and September 30, 2011.

Average Annual Total Returns

The table below shows the Fund's Class R shares average annual total returns (before and after taxes) and the change in value of a broad-based market index over various periods ended December 31, 2016. The information provides some indication of the risks of investing in the Fund by showing changes in the Fund’s performance from year to year and by showing how the Fund’s average annual returns compare with those of broad measure of the market’s performance. The Fund’s past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future.

After-tax returns are calculated using the highest individual federal marginal income tax rate in effect at the time of each distribution and assumed sale, but do not include the impact of state and local taxes.

Your actual after-tax returns depend on your own tax situation and may differ from those shown. After-tax returns reflect past tax effects and are not relevant to investors who hold their Fund shares in a tax-deferred account (including a 401(k) or IRA account), or to investors that are tax-exempt.

Average Annual Total Returns (for periods ended December 31, 2016)

<u>FUND/INDEX</u>	<u>1 YEAR</u>	<u>5 YEARS</u>	<u>Since Inception*</u>
Forester Value Fund-Class R			
Return before taxes	-4.26%	-0.53%	-0.40%
Return after taxes on distributions	-4.30%	-0.67%	-0.53%
Return after taxes on distributions and sale of Fund shares	-2.41%	-0.46%	-0.35%
S&P 500 Index (index reflects no deduction for fees, expenses or taxes)	11.95%	14.65%	12.42%

* Inception 12/28/2010

PORTFOLIO MANAGEMENT

Investment Adviser: Forester Capital Management, Ltd.

Portfolio Manager: Thomas H. Forester, President of the Fund's investment adviser, has been the Fund's portfolio manager since the Fund's inception (9/10/1999). Rebecca S. Scheuneman has been the Fund's Assistant Portfolio Manager since 2015.

PURCHASE AND SALE OF FUND SHARES

Minimum Initial Investment

\$2,500 for new accounts
\$2,000 for new IRA accounts

By Mail:

To Place Orders

Forester Value Fund Class R
c/o Mutual Shareholder Services
8000 Town Centre Drive, Suite 400
Broadview Heights, OH 44147

Minimum Subsequent Investment

\$100 for all existing accounts

By Phone: 1-800-388-0365

You may sell or redeem shares through your dealer or financial adviser, by writing to the address above or by telephone at the number above.

TAX INFORMATION

The Fund's distributions will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred account, such as a 401(k) plan, individual retirement account (IRA) or 529 college savings plan.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank or trust company), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create conflicts of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

ADDITIONAL INFORMATION ON STRATEGIES AND RISK

PRINCIPAL INVESTMENT STRATEGIES

The Fund seeks maximum long-term capital growth. The Fund may change this objective without the approval of shareholders, but will give shareholders not less than thirty (30) days advance notice if it does so.

The Fund invests in the stocks of large U.S. companies that it believes are undervalued and have great appreciation potential. It may also take defensive positions when the manager believes that the overall stock market is highly valued or that market conditions warrant it.

The Fund generally purchases a stock only at a price Forester Capital Management ("Forester Capital"), the Fund's investment manager (the "manager"), deems significantly below the intrinsic value of the company - Forester Capital's estimate of the amount a buyer would pay to own the entire company. Forester Capital performs its own fundamental analysis of the company.

The Fund places special focus on companies whose current market prices are low in relation to earnings and have great appreciation potential. In addition to stocks with low prices relative to earnings, Forester Capital also considers factors such as the following about the issuer:

- Book-to-market value
- Price-to-cash flow ratio
- Price-to-sales ratio
- Earnings estimates for the next 12 months
- Five-year return on equity

Securities may be undervalued as a result of overreaction by investors to unfavorable news about a company, industry or the stock markets in general or as a result of a market decline, poor economic conditions, or actual or anticipated unfavorable developments affecting the company. This undervaluation may lead to great appreciation potential for the security.

The Fund may sell a stock when Forester Capital thinks the stock is too expensive compared to Forester Capital's estimate of the company's intrinsic value, changing circumstances affect the original reasons for a company's purchase, a company exhibits deteriorating fundamentals or more attractive alternatives exist.

Under normal market conditions, the fund invests at least 65% of its net assets (at market value at the time of purchase) in the common stocks of large companies that have market capitalizations greater than \$5.0 billion. The Fund may also invest in preferred stocks, convertible securities, warrants and foreign securities. The Fund may also invest in stock index futures, stock index options and exchange traded funds. A description of the policies and procedures employed by the Fund with respect to the disclosure of Fund portfolio holdings is available in the Fund's statement of additional information ("SAI"), dated July 31, 2017.

MARKET EXPOSURE. In order to try to enhance returns, the manager may vary the Fund's exposure to the overall stock market. The manager may reduce market exposure when the manager believes that the overall stock market is highly valued or that market conditions warrant it. During these defensive periods, the Fund may invest some or all of its assets in stock index futures, options, other funds or fixed income instruments. If the Fund sells index futures, buys index puts, or buys inverse funds or inverse ETFs, these investments move inverse to the market. They protect the fund in falling markets, but hurt performance if the market rises. Taking a defensive position may cause the Fund to not achieve its investment objective.

PRINCIPAL RISKS

Like all mutual funds that invest in stocks, the Forester Funds take investment risks and it is possible for you to lose money by investing in the Fund. The manager's ability to choose suitable investments for the Fund has a significant impact on the Fund's ability to achieve its investment objective. The principal factors that might reduce the Fund's return include:

Stock Market Risk: The Fund invests primarily in common stocks and other equity securities. Over time, stocks have shown greater growth than other types of securities. In the short-term, however, stock prices fluctuate widely in response to company, market, economic or other news.

Value Investing Risk: From time to time "value" investing falls out of favor with investors. When it does, there is the risk that the market will not recognize a company's improving fundamentals as quickly as it normally would. During these periods, the Fund's relative performance may suffer.

Emphasize Sector Risk: If the Fund has a higher percentage of its total assets invested in a particular sector, changes affecting that sector may have a significant impact on the Fund's overall portfolio.

Varying Market Exposure Risk: If the Fund is in a defensive or offensive position, the Fund may not go in the same direction as the market and the Fund's performance may suffer.

Large-Size Company Risk: The Fund normally invests the majority of its assets in larger companies. Larger, more established companies may be unable to respond quickly to new competitive challenges like changes in consumer tastes or innovative smaller competitors. Also, larger companies are sometimes unable to attain the high growth rates of successful, smaller companies, especially during extended periods of economic expansion.

Options Risk: The primary risks associated with options investments are: (1) the risk that changes in the value of the investment will not correlate to changes in the value of the underlying security, which may result in imperfect hedging of a portfolio position, (2) options are more volatile than stocks and therefore may be subject to disproportionately larger gains or losses; and (3) the risk that the use of an option strategy to enhance the return of a portfolio will fail, with negative consequences to the Fund. Put options may not go in the same direction as the market and the Fund's performance may suffer. Accordingly, the Fund will limit its exposure to options to 5% of the value of the portfolio, based on the cost of the options, at any one time.

Stock Index Futures Risk: The primary risks associated with futures investments are: (1) the risk that changes in the value of the investment will not correlate to changes in the value of the underlying security, which may result in imperfect hedging of a portfolio position, (2) futures are more volatile than stocks and therefore may be subject to disproportionately larger gains or losses; and (3) the risk that the use of a futures strategy to enhance the return of a portfolio will fail, with negative consequences to the Fund. Accordingly, the Fund will limit its exposure to futures to 5% of the value of the portfolio, based on the cost of the futures, at any one time.

Fixed Income Risk: The primary risk associated with fixed income are: (1) the fixed income instrument may not go in the same direction as the market and the Fund's performance may suffer; (2) interest rates may rise, reducing the principal value of the instrument; and (3) the credit rating of the U.S. Agency instrument may materially differ from a similar U.S. Treasury.

Turnover Risk: Portfolio turnover refers to the rate at which the securities held by the Fund are replaced. The higher the rate, the higher the transactional and brokerage costs associated with the turnover which may reduce the Fund's return, unless the securities traded can be bought and sold without corresponding commission costs. Active trading of securities may also increase the Fund's realized short-term capital gains or losses, which may affect the taxes you pay as a Fund shareholder. Short-term capital gains are taxed as ordinary income under federal income tax laws.

An investment in the Fund is not a bank deposit, and is not insured or guaranteed by the Federal Deposit Insurance Corporation (FDIC) or any other Government agency.

Because of these risks the Fund is a suitable investment only for those investors who have long-term investment goals. Prospective investors who are uncomfortable with an investment that will increase and decrease in value should not invest in the Fund.

Portfolio Holdings

A description of the Fund's policies and procedures with respect to the disclosure of the Fund's portfolio securities is available in the Fund's Statement of Additional Information.

ORGANIZATION, MANAGEMENT & MANAGEMENT FEES

Organization: Forester Value Fund is a series of Forester Funds, Inc.

Management: The Fund is managed by Forester Capital Management, Ltd. ("Forester Capital"), which selects the Fund's investments and handles its business affairs under the direction of the Fund's board of directors. Forester Capital (the "Adviser") was incorporated in 1999 and its address is: 100 Field Drive, Lake Forest, Illinois 60045.

Portfolio Manager: The Forester Value Fund has been managed since its inception by Thomas H. Forester, CFA. Mr. Forester has been the President and Chief Investment Officer of Forester Capital since its inception and is primarily responsible for the day-to-day management of the Fund. Mr. Forester has extensive money management experience. He was an officer and portfolio manager from May 1997 through January, 1999 with Dreman Value Advisors, Inc. and its successor firm, Scudder Investments Inc. where he managed over \$1.4 billion in value assets, and an officer and portfolio manager from 1995 to 1997 with Peregrine Capital Management Inc., a subsidiary of Wells Fargo. He was also an officer and portfolio manager for Thomas White International from 1992 to 1995.

Mr. Forester holds an MBA from the Kellogg School at Northwestern University and a BA degree in economics (with honors) from the University of Colorado (1981).

Mr. Forester has appeared on CNBC and Bloomberg TV as well as in articles in The Wall Street Journal, Fortune Magazine, Barron's, Business Week, Smart Money, Kiplinger's, Washington Post, USA Today and Marketwatch.

Rebecca Scheuneman has been employed by Forester Capital Management since 4/1/2010 and has been Assistant Portfolio Manager of the Fund since 2015. She is responsible for stock selection in the Consumer Discretionary, Consumer Staples and Health Care sectors. Prior to joining Forester, she ran nearly \$2 billion in Large Cap assets in her 10 years at Allstate Insurance as part of a three member team. She specialized in Consumer Discretionary, Consumer Staples and Technology, while also following Energy and Basic Materials. Ms. Scheuneman, CFA, holds an MBA from DePaul University in Finance.

The Fund's SAI contains more information about the Portfolio Manager's compensation, other accounts managed by the Portfolio Manager, and the Portfolio Manager's ownership of Fund shares.

Management and Administrative Fees: The Forester Value Fund pays fees to Forester Capital for serving as its investment adviser and providing administrative services. The annual fees are determined as a percentage of average daily net assets. Expenses paid out of the Fund's assets are reflected in the share price and dividends. As of the date of this Prospectus, the Fund pays Forester Capital management fees of 0.89% of the Fund's average daily net assets. Class R shares pay Forester Capital an administrative fee for all other expenses related to its daily operations of 0.11%. Under the administration agreement, Forester Capital provides administrative services and pays all expenses related to the Fund's daily operations, excluding the management fees and certain excluded expenses. These expenses reflect current fees of the Fund, which are different from periods prior to the effective date of this Prospectus. The Fund's Annual Report or Semi-Annual Report contains more information about the factors considered by the Board when it last renewed the investment advisory agreement with Forester Capital. During the fiscal year ended March 31, 2017, the Fund paid Forester Capital 0.89% of the Fund's average daily assets in management fees and 0.11% of the Fund's average daily assets in administration fees.

FUND'S SHARE PRICE

The price at which investors purchase Class R shares of the Fund and at which shareholders redeem Class R shares of the Fund is called net asset value. The Fund calculates net asset value ("NAV") for each class as of the close of regular trading on the New York Stock Exchange (normally 4:00 p.m. Eastern Time) on each day the New York Stock Exchange is open for trading. The New York Stock Exchange is closed on holidays (New Year's Day, Martin Luther King, Jr. Day, President's Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day) and weekends. The Fund's shares will not be priced when the New York Stock Exchange is closed. The Fund calculates net asset value based on the market prices of the securities it holds. The Fund will process purchase and redemption orders that it receives in good order prior to the close of regular trading on a day that the New York Stock Exchange is open at the net asset value determined later that day. It will process purchase orders that it receives in good order and accepts and redemption orders that it receives in good order after the close of regular trading at the net asset value determined at the close of regular trading on the next day the New York Stock Exchange is open. "Good order" means that your purchase or redemption request includes the name of the Fund, the name of the shareholder(s), the dollar amount of shares to be purchased or redeemed, a completed account application (for initial purchase), and, for purchases, a check payable to the Fund, unless payment is made by wire transfer.

Fair Value Pricing

The Board of Directors has delegated to Forester Capital responsibility for determining the value of Fund portfolio securities under certain circumstances. Under such circumstances, Forester Capital will use its best efforts to arrive at the fair value of a security held by the Fund under all reasonably ascertainable facts and circumstances. Forester Capital must prepare a report for the Board not less than quarterly containing a complete listing of any securities for which fair value pricing was employed and detailing the specific reasons for such fair value pricing. The Fund has adopted written policies and procedures to guide Forester Capital with respect to the circumstances under which, and the methods to be used, in fair valuing securities.

The Fund invests the vast majority of its assets in frequently traded exchange listed securities of domestic issuers with relatively liquid markets and calculate its NAV as of the time those exchanges close. The Fund typically does not invest in securities on foreign exchanges or in illiquid or restricted securities. Accordingly, there may be very limited circumstances under which the Fund would ever hold a security that would need to be fair value priced. Examples of when it would be likely that a portfolio security would require fair value pricing include but are not limited to: if the exchange on which a portfolio security traded were to close early; if trading in a particular security were to be halted on an exchange and did not resume trading prior to calculation of NAV; if a significant event that materially affected the value of a security were to occur after the securities' exchange had closed but before the Fund's NAV had been calculated; and if a security that had a significant exposure to foreign operations was subject to a material event or occurrence in a foreign jurisdiction in which the company had significant operations.

When a security is fair value priced, it means that Forester Capital is calculating the value of that security on a day and under circumstances where reliable pricing information from normal sources is not available. Accordingly, there is always the possibility that Forester Capital's calculations concerning security value could be wrong, and as a result, the Fund's NAV on that day could be higher or lower, depending on how the security was valued, than would otherwise be the case.

PURCHASE OF SHARES

How to Purchase Shares from the Funds

1. Read this Prospectus carefully
2. Determine how much you want to invest keeping in mind the following minimums:

Account Type	Class R
New Accounts	\$2,500
New IRA accounts	\$2,000
Additions to existing accounts	\$100

If your investment is aggregated into an omnibus account established by a plan sponsor, investment adviser, broker or other intermediary, the account minimums apply to the omnibus account, not to your individual investment. If you purchase or redeem shares through a broker-dealer or another intermediary, you may be charged a fee by that intermediary.

3. Complete the Share Purchase Application accompanying this Prospectus, carefully following the instructions including designation of share class. For additional investments, complete the reorder form attached to your confirmation statements (The Fund has additional Purchase Applications and reorder forms if you need them.) If you have any questions, please call 1-800-388-0365.

4. Make your check payable to "The Forester Funds, Inc." or to the "Forester Value Fund". All checks must be drawn on U.S. banks. The Funds will not accept cash or third party or starter checks. A \$25 fee will be charged against your account for any payment check returned for insufficient funds. You will also be responsible for any losses suffered by a Fund as a result.

5. Send the completed and signed application and check by first class mail, overnight delivery or registered mail to:

The Forester Value Fund – Class R
c/o Mutual Shareholder Services
8000 Town Centre Drive, Suite 400
Broadview Heights, OH 44147

Forester Value Fund does not accept shareholder investment checks at its corporate offices. Checks received at those offices will be forwarded to Mutual Shareholder Services and will not be effective until the order is received and accepted there.

By Wire: Please call 800-388-0365 for wire instructions.

Retirement Plans

Since the Fund is oriented to longer term investments, the Fund may be an appropriate medium for tax-sheltered retirement plans, including: individual retirement accounts ("IRAs"); simplified employee pensions ("SEPs"); 401(k) plans; qualified corporate pension and profit-

sharing plans (for employees); tax deferred investment plans (for employees of public school systems and certain types of charitable organizations); and other qualified retirement plans. You may download forms from our website, or you may contact Mutual Shareholder Services, the transfer agent, at 1-800-388-0365 for the procedure to open an IRA or SEP plan, as well as more specific information regarding these retirement plan options. Please consult with an attorney or tax advisor regarding these plans. You must pay custodial fees for your IRA by redemption of sufficient shares of the Fund from the IRA unless you pay the fees directly to the IRA custodian. Call the transfer agent about the IRA custodial fees.

Purchasing Shares from Broker-dealers, Financial Institutions and Others

Some broker-dealers may sell shares of the Fund. These broker-dealers may charge you a fee in addition to any fees imposed by the Fund, either at the time of purchase or redemption. The fee, if charged, is retained by the broker-dealer and not remitted to the Funds or the Adviser.

The Funds may enter into agreements with broker-dealers, financial institutions or other service providers ("Servicing Agents") that may include the Funds as investment alternatives in the programs they offer or administer. Servicing agents may:

1. Become shareholders of record of the Fund. This means all requests to purchase additional shares and all redemption requests must be sent through the Servicing Agent. This also means that purchases made through Servicing Agents are not subject to the Fund's minimum purchase requirements.

2. Use procedures and impose restrictions that may be in addition to, or different from, those applicable to investors purchasing shares directly from the Funds.

3. Charge fees to their customers for the services they provide them. Also, the Funds (through 12b-1 fees) may pay fees to Servicing Agents to compensate them for selling the Funds. The Adviser (from its management fees) may pay fees to Servicing Agents to compensate them for the services they provide their customers, including administrative services.

4. Be allowed to purchase shares by telephone with payment to follow the next day. If the telephone purchase is made prior to the close of regular trading on the New York Stock Exchange, it will receive same day pricing.

5. Be authorized to accept purchase orders on behalf of the Fund. This means that the Fund will process the purchase order at the net asset value which is determined following the Servicing Agent's acceptance of the customer's order.

If you decide to purchase shares through Servicing Agents, please carefully review the program materials provided to you by the Servicing Agent. When you purchase shares of the Fund through a Servicing Agent, it is the responsibility of the Servicing Agent to place your order with the Fund on a timely basis. If the Servicing Agent does not, or if it does not pay the purchase price to the Fund within the period specified in its agreement with the Fund, it may be held liable for any resulting fees or losses.

Other Information about Purchasing Shares of the Fund

The Fund may reject any share purchase applications for any reason. The Fund will not accept initial purchase orders made by telephone unless they are from a Servicing Agent which has an agreement with the Fund.

The Fund will only issue shares in book form. The Fund will send you a written confirmation for all purchases of shares.

THE DISTRIBUTION PLAN

The Fund has adopted a Plan of Distribution Pursuant to Rule 12b-1 under the Investment Company Act of 1940, as amended (the 12b-1 Plan) for Class R shares of the Fund, pursuant to which the Fund is permitted to accrue and pay a fee for shareholder servicing and distribution expenses not to exceed 0.50% per annum of the Fund's average daily net assets. The Fund may accrue, collect and pay such fees to third parties for eligible services provided by those parties to the Fund. You should be aware that because these fees are paid out of the Fund's assets on an ongoing basis, over time these fees will increase the costs of your investment and may cost you more than paying other types of sales charges. For further information regarding the 12b-1 Plan, see the SAI.

Other Share Classes

The Fund offers two other classes of shares (Class N and Class I.) Class N, which is offered by a separate Prospectus, pays lower 12b-1 fees. Class I, which is offered by a separate Prospectus, is subject to higher minimum investments and does not pay Rule 12b-1 fees.

REDEEMING SHARES

General Redemption Information

You may redeem all or a portion of your shares at any time. Your shares will be redeemed at the Fund's Class R per share NAV next determined after receipt of your instructions in good order as explained below. The Fund's Class R NAV will fluctuate on a daily basis.

The redemption value of your shares may be more or less than the purchase price, depending on the market value of the investment securities held by the Fund at the time your redemption is processed.

How to Redeem (Sell) Shares by Mail

1. Prepare a letter of instruction containing:

- o the name of the Fund(s) and share class
- o account number(s)
- o the amount of money or number of shares being redeemed
- o the name(s) on the account
- o daytime phone number
- o additional information that the Funds may require for redemptions by corporations, executors, administrators, trustees, guardians, or others who hold shares in a fiduciary or representative capacity. Please contact the Fund, in advance, at 1-800-388-0365 if you have any questions.

2. Sign the letter of instruction exactly as the shares are registered.

Joint ownership accounts must be signed by all owners.

3. Have the signatures guaranteed by a commercial bank or trust company in the United States, a member firm of the New York Stock Exchange or other eligible guarantor institution in the following situations:

- o The redemption request exceeds \$25,000
- o The redemption proceeds are to be sent to an address other than the address of record
- o The Fund receives the redemption request within 30 business days of an address change.

A notarized signature is not an acceptable substitute for a signature guarantee.

4. Send the letter of instruction by first class mail, overnight delivery service or registered mail to:

The Forester Value Fund
c/o Mutual Shareholder Services
8000 Town Centre Drive, Suite 400
Broadview Heights, OH 44147

How to Redeem (Sell) Shares through Servicing Agents

If your shares are held by a Servicing Agent, you must redeem your shares through the Servicing Agent. Contact the Servicing Agent for instructions on how to do so.

Payment of Redemption Proceeds

The redemption price per share you receive for redemption requests is the next determined net asset value after:

1. The Fund receives your written request in proper form with all required information, as defined above under "How to Redeem (Sell) Shares by Mail" and "How to Redeem (Sell) Shares through Servicing Agents".
2. A Servicing Agent that has been authorized to accept redemption requests on behalf of the Funds receives your request in accordance with its procedures.

For those shareholders who redeem shares by mail the Fund will mail a check in the amount of the redemption proceeds no later than the seventh day after it receives the redemption request in proper form with all required information. Those shareholders who redeem shares through Servicing Agents will receive their redemption proceeds in accordance with the procedures established by the Servicing Agent.

As the Fund generally holds an allocation of cash, there is typically enough cash on hand in both stressed and non-stressed markets to fund redemptions. If more liquidity is needed, the Fund may opt to sell T-bills. In addition, the Fund's equity securities are very liquid and can be sold if needed.

Other Redemption Considerations

When redeeming shares of the Fund, shareholders should consider the following:

1. The redemption may result in a taxable gain.
2. If you purchased shares by check, the Fund may delay the payment of redemption proceeds until they are reasonably satisfied the check has cleared (which may take up to 15 days from the date of purchase).

3. For Class R shares, if your account balance falls below \$2,500 because you redeem shares, you will be given 60 days to make additional investments so that your account balance is \$2,500 or more. If you do not, the Fund may close your account and mail the redemption proceeds to you.
4. The Funds may pay redemption requests "in kind." This means that the Fund will pay redemption requests entirely or partially with securities rather than with cash.

FREQUENT PURCHASES AND REDEMPTIONS OF FUND SHARES

Frequent purchases and sales of Fund shares (popularly known as "market timing") can harm shareholders in various ways, including reducing the returns to long-term shareholders by increasing costs to the Fund (such as brokerage commissions), disrupting portfolio management strategies, and diluting the value of the shares of long-term shareholders in cases in which fluctuations in markets are not fully priced into the Fund's NAV. The Fund's Board of Directors is firmly opposed to allowing shareholders of the Fund to engage in these types of practices. Accordingly, the Board of Directors has adopted policies and procedures designed to discourage excessive or short-term trading of Fund shares. You should be aware that there is the risk that the Fund's policies and procedures will prove ineffective in whole or in part to detect or prevent frequent trading. The Fund may alter its policies at any time without prior notice to shareholders.

Although shareholders who engage in market timing activities can harm the Fund, the Board has noted an important distinction between market timers, who the Board seeks to discourage from using the Fund, and other shareholders. Shareholders who purchase Fund shares and then, for whatever reason, must redeem them are not market timers. Market timers are shareholders who repeatedly purchase and redeem shares in the Fund in an attempt to gain short-term advantages from their trading activity. These types of shareholders are disruptive to the Fund, and it is these types of shareholders that the Fund seeks to discourage from purchasing Fund shares.

In order to discourage frequent purchasing and redemption of Fund shares, the Fund reserves the right, but does not have the obligation, to reject any purchase or exchange transaction at any time. In addition, Forester Capital has been granted the authority to impose restrictions in addition to those that are otherwise stated in this prospectus on purchases or exchanges under conditions where Forester Capital has identified a trading pattern by a shareholder that is particularly disruptive, excessive, or extremely short-term in duration.

The Fund further prohibits any person associated with the Fund from entering into any arrangement with any person to permit frequent purchases and redemption of Fund shares. The Fund's Chief Compliance Officer is responsible for monitoring the Fund's policies and procedures to discourage frequent purchases and redemptions and prepares periodic reports to the board concerning the implementation and effectiveness of those policies and procedures.

Forester Capital is authorized to suspend the Fund's policies during periods of severe market turbulence or national emergency only. There is no assurance that Forester Capital will exercise this authority or that by exercising this authority the Fund will be protected from the risks associated with frequent trading. The actions of Forester Capital are periodically reviewed with the Board of Directors.

DIVIDENDS, DISTRIBUTIONS AND TAXES

The Fund distributes substantially all of its net investment income and its capital gains annually. You have two distribution options:

- Automatic Reinvestment Option - Both dividend and capital gains distributions will be reinvested in additional Fund Shares.
- All Cash Option - Both dividend and capital gains distributions will be paid in cash.

You may make this election on the Share Purchase Application. You may change your election by writing to the Fund at the address given above.

The Fund's distributions, whether received in cash or additional shares of the Fund, may be subject to federal and state income tax. These distributions may be taxed as ordinary income and capital gains (which may be taxed at different rates depending on the length of time the Fund holds the assets generating the capital gains). The Funds expect that its distributions, as a result of its investment objectives or strategies, will consist primarily of ordinary income or capital gains. An exchange of the Fund's shares for shares of another fund will be treated as a sale of the Fund's shares and any gain on the transaction may be subject to federal and state income tax.

The Fund annually will endeavor to qualify for and elect tax treatment applicable to a regulated investment company under Subchapter M of the Internal Revenue Code of 1986 (the "Code"). The Fund has so qualified in each of its fiscal years. If a Fund fails to qualify as a regulated investment company under Subchapter M in any fiscal year, it will be treated as a corporation for federal income tax purposes. As such the Fund would be required to pay income taxes on its net investment income and net realized capital gains, if any, at the rates generally applicable to corporations. Stockholders of a Fund that did not qualify as a regulated investment company under Subchapter M would not be liable for income tax on the Fund's net investment income or net realized capital gains in their individual capacities. Distributions to stockholders, whether from the Fund's net investment income or net realized capital gains, would be treated as taxable dividends to the extent of current or accumulated earnings and profits of the Fund.

The Fund intends to distribute all of its net investment income and net capital gain each fiscal year. Dividends from net investment income (including short-term capital gain) are taxable to investors as ordinary income, whereas distributions of net realized long-term capital gains are taxable as long-term capital gains regardless of the stockholder's holding period for the shares. Such dividends and distributions are

taxable to stockholders, whether received in cash or in additional shares of the respective Funds. A portion of the Fund's income distributions may be eligible for the 70% dividends-received deduction for domestic corporate stockholders.

Any dividend or capital gain distribution paid shortly after a purchase of shares of a Fund will have the effect of reducing the per share net asset value of such shares by the amount of the dividend or distribution. Furthermore, if the net asset value of the shares of a Fund immediately after a dividend or distribution is less than the cost of such shares to the investor, the dividend or distribution will be taxable to the investor.

Redemption of shares will generally result in a capital gain or loss for income tax purposes. The tax treatment of such capital gain or loss will depend upon the stockholder's holding period. However, if a loss is realized on shares held for six months or less, and the stockholder received a capital gain distribution during that period, then such loss is treated as long-term capital loss to the extent of the capital gain distribution received.

This section is not intended to be a full discussion of present or proposed federal income tax laws and the effect of such laws on an investor. Investors are urged to consult with their respective tax advisers for a complete review of the tax ramifications of an investment in a Fund.

PRIVACY POLICY

The following is a description of the Fund's policies regarding disclosure of nonpublic personal information that you provide to the Fund or that the Fund collects from other sources. In the event that you hold shares of the Fund through a broker-dealer or other financial intermediary, the privacy policy of your financial intermediary would govern how your nonpublic personal information would be shared with unaffiliated third parties.

Categories of Information the Fund Collects. The Fund collects the following nonpublic personal information about you:

- Information the Fund receives from you on or in applications or other forms, correspondence, or conversations (such as your name, address, phone number, social security number, assets, income and date of birth); and
- Information about your transactions with the Fund, its affiliates, or others (such as your account number and balance, payment history, parties to transactions, cost basis information, and other financial information).

Categories of Information the Fund Discloses. The Fund does not disclose any nonpublic personal information about its current or former shareholders to unaffiliated third parties, except as required or permitted by law. The Fund is permitted by law to disclose all of the information it collects, as described above, to its service providers (such as the Fund's custodian and transfer agent) to process your transactions and otherwise provide services to you.

Confidentiality and Security. The Fund restricts access to your nonpublic personal information to those persons who require such information to provide products or services to you. The Fund maintains physical, electronic and procedural safeguards that comply with federal standards to guard your nonpublic personal information.

FINANCIAL HIGHLIGHTS

The financial highlights table is intended to help you understand the financial performance of The Forester Value Fund's operations since inception. Certain information reflects financial results for a single Fund share. The total returns in the tables represent the rate that an investor would have earned on an investment in the Fund (assuming reinvestment of all dividends and distributions). This information has been audited by Sanville & Company, whose report, along with the Fund's financial statements for the period ended March 31, 2016, are included in the Fund's Audited Annual Report which is available without charge upon request.

THE FORESTER VALUE FUND - Class R shares

For the Period Ended March 31,	<u>2017</u>	<u>2016</u>	<u>2015</u>	<u>2014</u>	<u>2013</u>
Net Asset Value, at Beginning of Period	<u>\$12.58</u>	<u>\$12.85</u>	<u>\$12.80</u>	<u>\$12.37</u>	<u>\$12.35</u>
